Instructions Sheet

Please read this sheet with guidelines on composition. You are most definitely not required to follow the guidelines on the sheet, it is just meant to give you some possible perspectives on how to consider composition.

I will ask you to take two sets of 3 different photo tasks. For each photo task, please focus on composition -- you will want to have a photo for each task that you like the composition of. Feel free to explore and try out different compositions and shots, but each time you try out a different idea, please take a photo to record that photo idea. However, try to limit each photo to around 1-2 minutes.

Here is the tool you'll be using. When you click the photo button, the screen should flash white to indicate that a photo has been taken. Please skim the front of this sheet for a brief tutorial.

If at any point you want to look at the photos you've taken, you can see them by going to the Photos app. The app does not have features like tap to focus or sliders to adjust exposure, so don't worry about those aspects of the photo and focus on just the overall composition.

[show App Tutorial]

[if first condition is adaptive, show Saliency]

I'll be using screen record to capture the screen as well as audio. Please try to talk aloud about your thought process as you plan/take photos.

Tasks #1 (bio):
1. Please take a photo where bulbasaur is the subject of the photo. He should fill enough of the screen to be the main focus of the image -- you'll want to be within 3 feet of it.
2. Please take a photo of this chair/bench. Again, it is the subject so you want it to be the main focus. You don't need to capture the entire chair, but there should be enough for people to be able to interpret what it is.
3. Please take a photo that captures the front facades of this building. Again, you don't need to capture it in its entirety, but there should be enough that people can get a sense of how this part of the building looks.

Tasks #2 (art):
4. mug (map to bio task 1)
5. bench (map to bio task 2)
6. building/landscape (map to bio task 3)
